

In the Specification

Please amend the specification as follows:

On page 8, at line 18, please insert the term “coating” after the phrase “such a”.

On page 11, at line 16, please replace the term “discussION” with the term “discussion”.

On page 18, line 19, please insert the sentence “Support rollers 310 are spaced along the length of each coating zone” after the term “barriers 340.”

On page 21, at line 10, please replace the term “or and/or” with the term “and/or”.

On page 28, line 2, please replace the term “not” with the term “nor”.

Please replace the current abstract with the following abstract:

A glass article which has a water-sheeting coating and a method of applying coatings to opposed sides of a substrate are described. In one embodiment, a glass sheet is provided bearing a sputtered water-sheeting coating comprising silica on an exterior surface and bearing a reflective coating on an interior surface. The interior surface of a sheet of glass can be coated with a reflective coating by sputtering, in sequence, at least one dielectric layer, at least one metal layer, and at least one dielectric layer. The exterior surface of the glass can be coated with a water-sheeting coating by sputtering silica directly onto the exterior surface of the sheet of glass. Both the reflective coating and the water-sheeting coating can be applied during the same pass through the same sputter coating apparatus.

In the Drawings

Please replace current Figures 2, 3, 7 and 10 with amended Figures 2,3, 7 and 10 enclosed herein.
